*When  
Your Cabin  
Environment  
Demands the  
Big Picture*

**built-in quality - lasting value** Engineered specifically for the aircraft environment, the Mimo Enterprises CRT's- 16" & 14" monitor delivers exceptional performance in a light weight, compact design. Providing reliability and a long-life expectancy of 24,000 hours, it is the ideal monitor for situations requiring a larger and nice picture in a relatively small amount of space. Add to this a service and support network unparalleled in the air transportation industry, and you will discover a monitor with quality built in, not added on.

- **adaptable design** Permits the flexibility of either ceiling or customer-determined cabin mounting
- **infra-red remote** Provides hand-held, convenient, easy-to-use control, allowing maintenance personnel to quickly adjust the picture to optimum brightness, contrast, color and tint
- **pressure activated switch** With an important emphasis on safety, power automatically shuts off in the event of rapid cabin decompression above 7,000 feet monitors meet FAA and X-ray safety guidelines

• **versatile selection** Automatic acceptance of either PAL or NTSC formats provides quick, full-resolution viewing

**Reliable products** From a design specifically engineered for the aircraft environment to the strongest, most knowledgeable technical support team in the IFE industry, the Mimo Enterprises CRT's monitor offers quality, reliability and superior performance.

CRT monitor is the perfect solution.
